

UNION of CHAMBER of TURKISH ENGINEERS AND ARCHITECTS

CHAMBER of MINING ENGINEERS

VI. International Drilling Congress and Exhibition
08-09 May 2025/ Ankara

www.drilling.org.tr

Dear Colleagues,

VI. International Drilling Congress and Exhibition of Türkiye (Drilling Turkey 2025) will be held between 8-9 May 2025, hosted by TMMOB Chamber of Mining Engineers, at General Directorate of Mineral Research and Exploration in Ankara.

Digitalization, which has begun to transform many aspects of our lives, also significantly changes the drilling industry. As the drilling industry continues to grapple with today's challenges, it is becoming increasingly clear that digital transformation will play a key role in shaping the future of drilling. Real-time data management, automation, artificial intelligence, virtual reality and digital technologies have the power to revolutionize the drilling industry.

In the two-day interactive congress; It aims to bring together industry leaders, innovators, industry experts, researchers and practitioners, ultimately providing a platform for discussion, experience, knowledge sharing and collaboration between them. Our aim is to investigate the current state of digitalization in drilling operations, examine its potential benefits and challenges, and identify opportunities for improvement.

The event will feature a variety of innovative ideas and technical presentations from different stakeholders of drilling, as well as innovative technologies created and adopted by drilling companies and manufacturers in the exhibition hall. So get ready to be inspired.

We are excited to invite you and the industry's stakeholders and technological pioneers to this meeting, where minds and innovations come together, in Ankara in May 2025, and we offer our respects.

İlker Ertem
Congress Chairman

Ayhan Yüksel
Chairman of the Board

Our chamber is a public occupational organization founded under the 135th article of the constitution related with 6235 law no
